Connection method	Colour temperature	Luminous flux
with handle	6500 K	1000 lm
LED light	Ingress protection rating	
yes	IP 68	

OPIS

Practical light with a long spiral cable and a cigarette lighter plug. **LRD 2688** is equipped with a long spiral cable (**8 m**), which makes operating around the vehicle much easier. Regardless of the situation, the cable allows you to move freely, ensuring comfort and efficiency of work. Thanks to the **12/24 V** cigarette lighter plug, the lamp can be easily connected to a socket in any vehicle, which makes it an extremely universal tool. The lamp housing is made of aluminum, facilitating heat dissipation. The tilting support allows you to change the angle of the lamp and thus the light distribution. The lamp is completely resistant to mechanical damage, extremely durable in contact with dirt and moisture (ingress protection rating **IP 68**). All lighting products are made **in Poland** by Horpol, which is one of the leading automotive lamp manufacturer.
